

JOB OPPORTUNITY

Job Title: Cardiac Intensivist

Date Posted: June 1, 2020

Job Location: Atlanta, Georgia

Job Requirements:

The candidate should have completed training and be BC/BE in pediatric cardiology, or pediatric critical care with additional training completed in pediatric cardiac intensive care, or dual Cardiology/Critical Care training. Salary is commensurate with experience and qualifications. Teaching responsibilities include the education of residents, fellows, and advanced care practitioners.

Job Description:

The Sibley Heart Center at Children's Healthcare of Atlanta, Emory University School of Medicine, is recruiting a cardiac intensivist at the assistant or associate professor level. The candidate would join our team of 11 cardiac intensivists to staff the cardiac intensive care unit. The candidate will join the division of pediatric cardiology of Emory University School of Medicine, with more than 50 faculty members. Children's Healthcare of Atlanta is the largest pediatric referral center in the Southeast, with 550 pediatric beds, and 1,400 pediatric general and specialist healthcare providers. The pediatric cardiac program is one of the largest in the United States, with in excess of 800 cardiac surgeries performed each year.

The dedicated Cardiac ICU is currently a 27-bed unit with a planned expansion to 32 beds in the next 6 months. The Cardiac ICU has over 1000 annual admissions and is complemented by a cardiac acute care unit with an additional 35 beds. The division of pediatric cardiology provides surgical and inpatient cardiac care for the vast majority of the children in the state of Georgia, with a catchment population of approximately 10 million. The heart transplant program, one of the busiest in the nation, has performed over 350 pediatric heart transplants to date, and is an important component of the ICU that includes a busy heart failure and VAD service.

The cardiac research enterprise includes clinical research, a cardiac outcomes center, and basic science research. Pediatric cardiac device development and use of innovative technologies occurs through our research partnership with Georgia Institute of Technology and Emory University.
